

International Traineeship Kuopio Finland

Fiber Optic Module
Tim Baas & David van Vliet

Content

- Personal Experience
- Making Cat 6 cables
- Mounting Cat 6 wall plugs & management
- Cat 6 cable measurement
- Welding Fiber Optic cables
- Managing the Fiber Optic Patchbox
- Mounting Fiber Optic cables
- Configuring the Cisco router
- Testing the network

Personal Experience

Tim Baas, 20 years old from Gouda, the Netherlands

David van Vliet, 18 years old from Oudewater, the Netherlands

We have been in Kuopio for three weeks to follow the international traineeship of the EM-EU project.

We stayed at an apartment in rauhalhti which is south in Kuopio and is good to travel by bus to the Savo Vocational College.

We have learned a lot about Cat 6 and Fiber Optic cables at the Savo Vocational College in those three weeks.

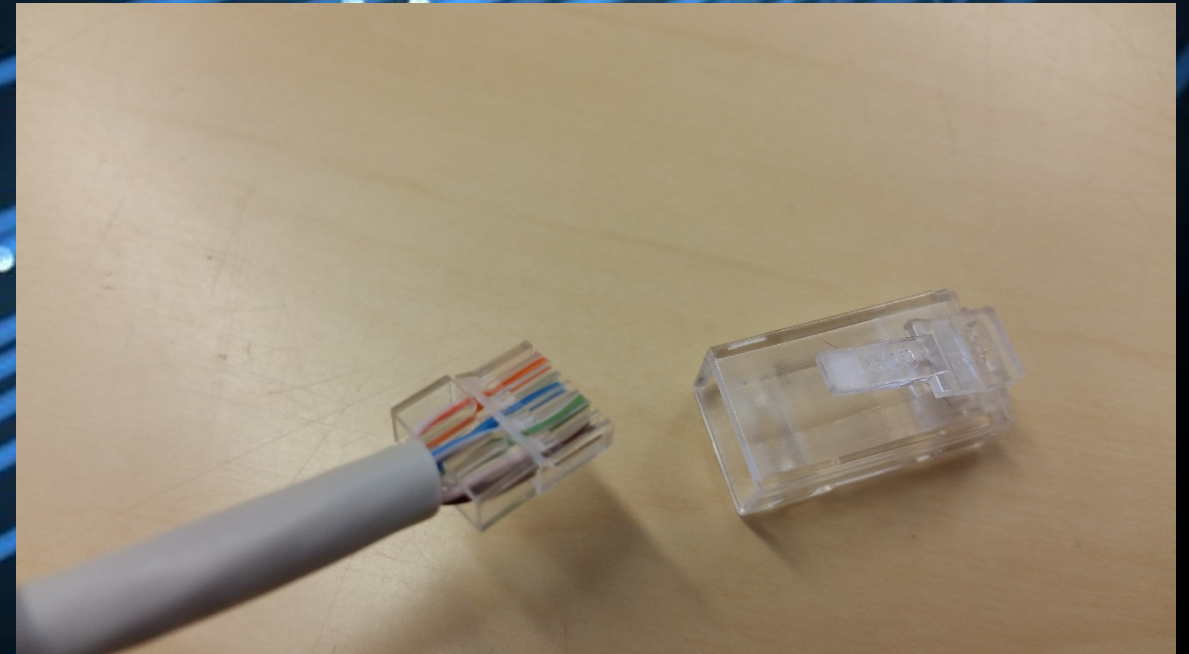

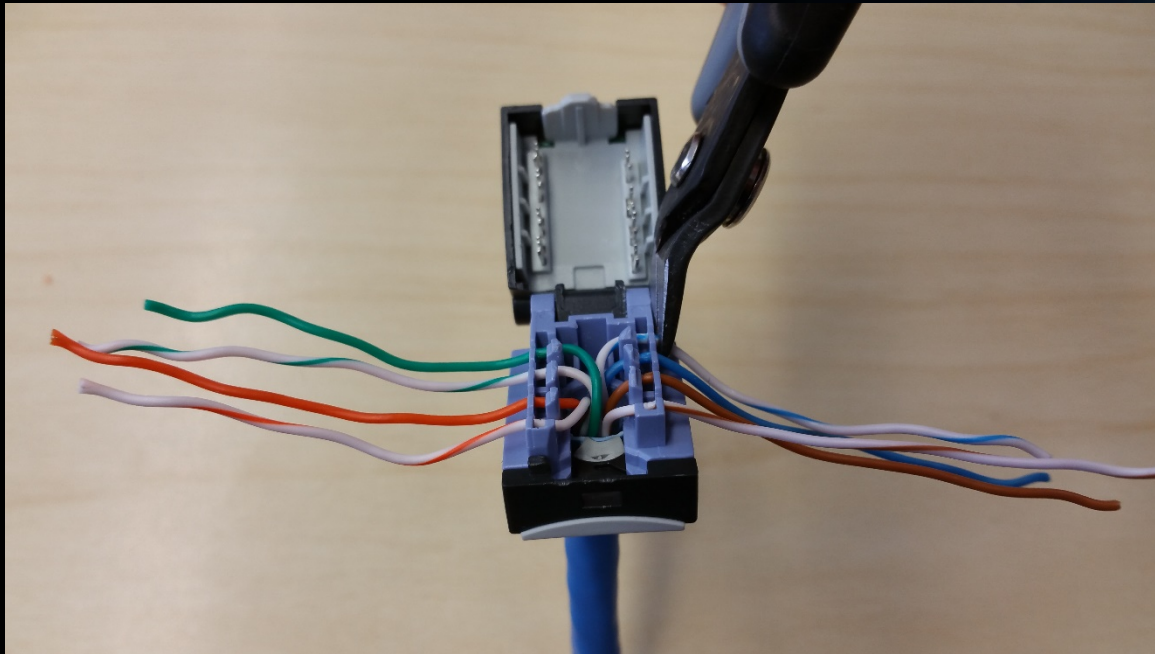

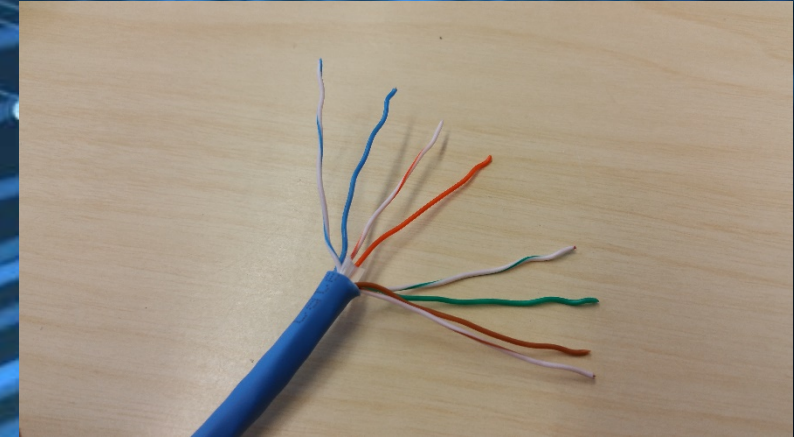

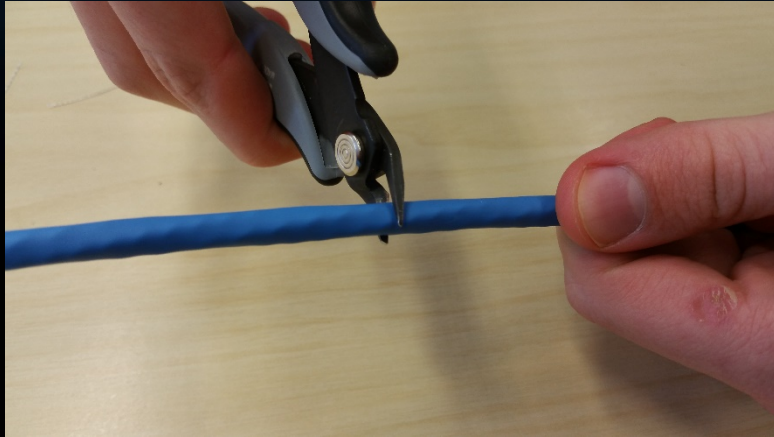

There was a very good practical room to test and manage our network that we made.

We also liked the teachers who gave good information and took the time for us to manage our network.

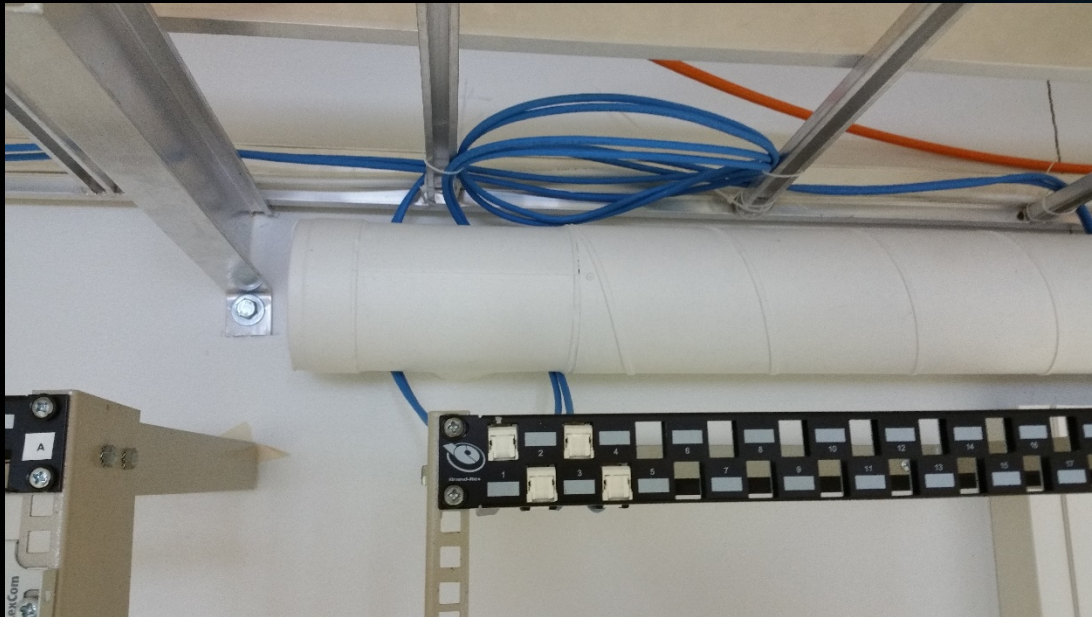

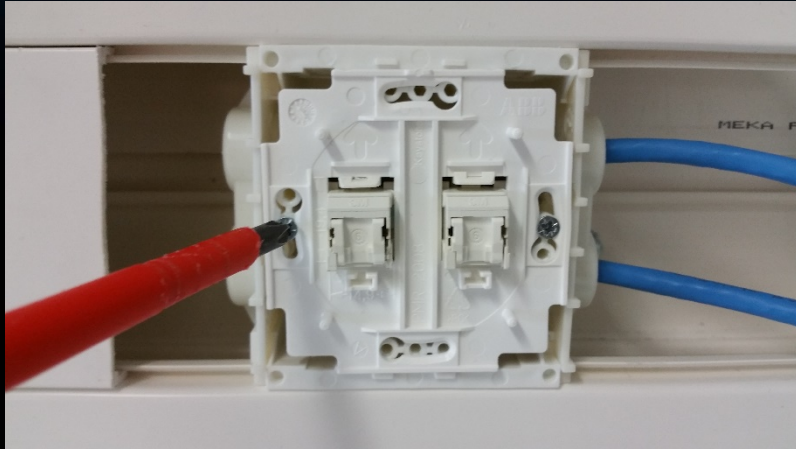

After all we enjoyed our three weeks at the Savo Vocational College really and you can see what we have done in the sheets below.

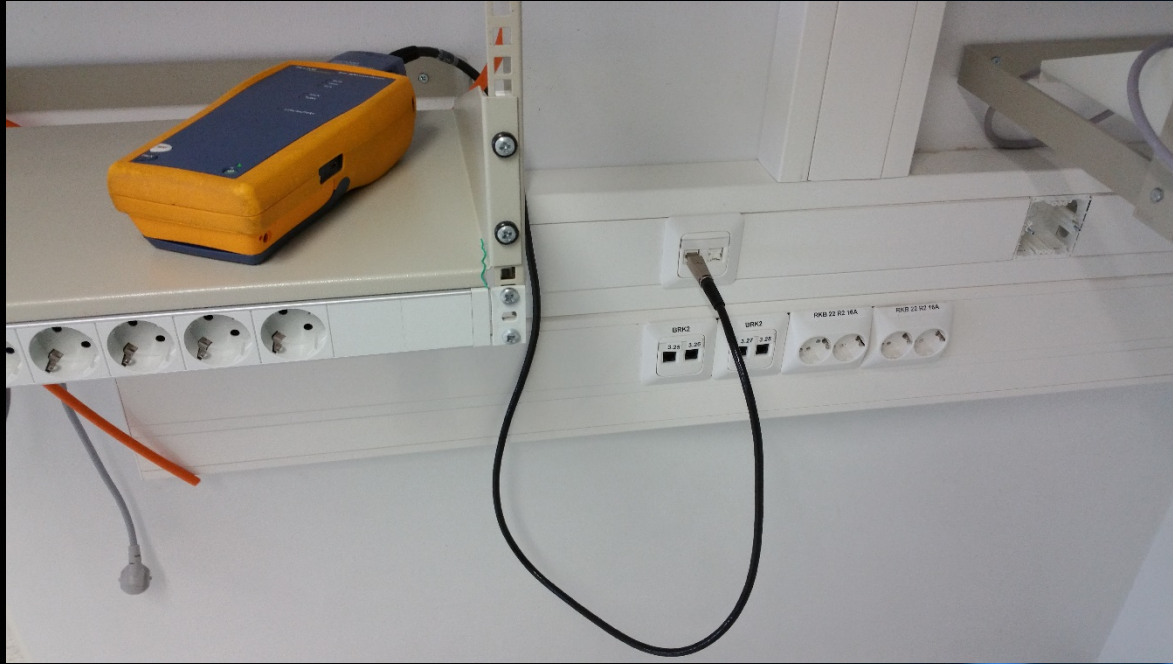

Making Cat 6 cables

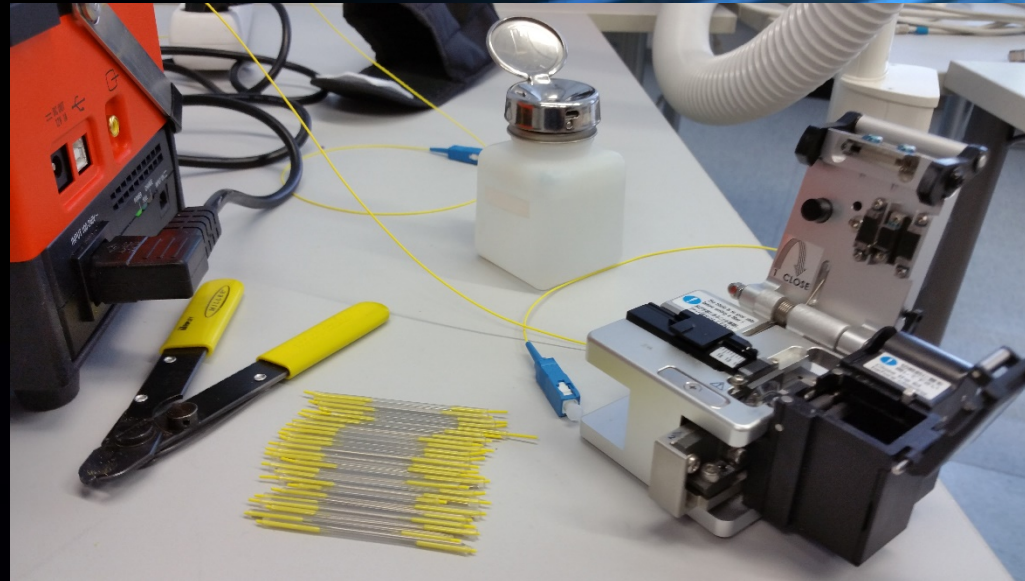

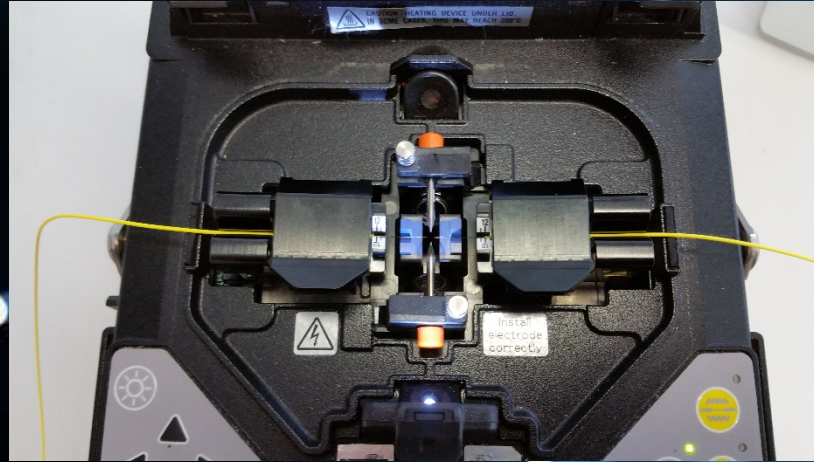

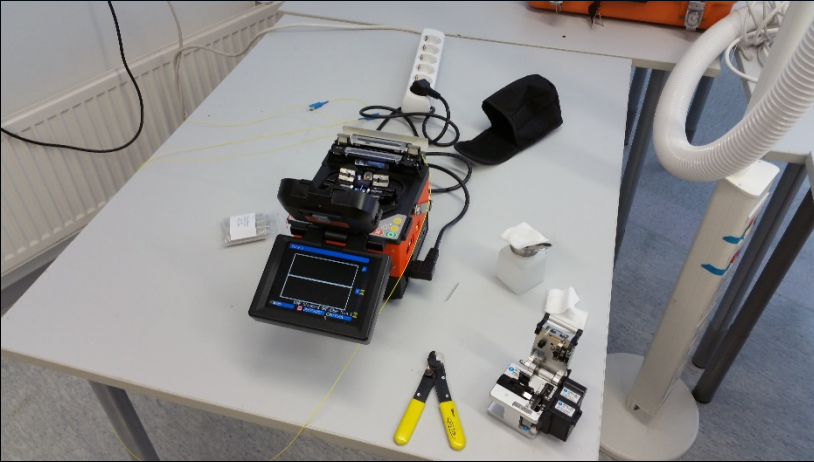

Mounting Cat 6 wall plugs & Management

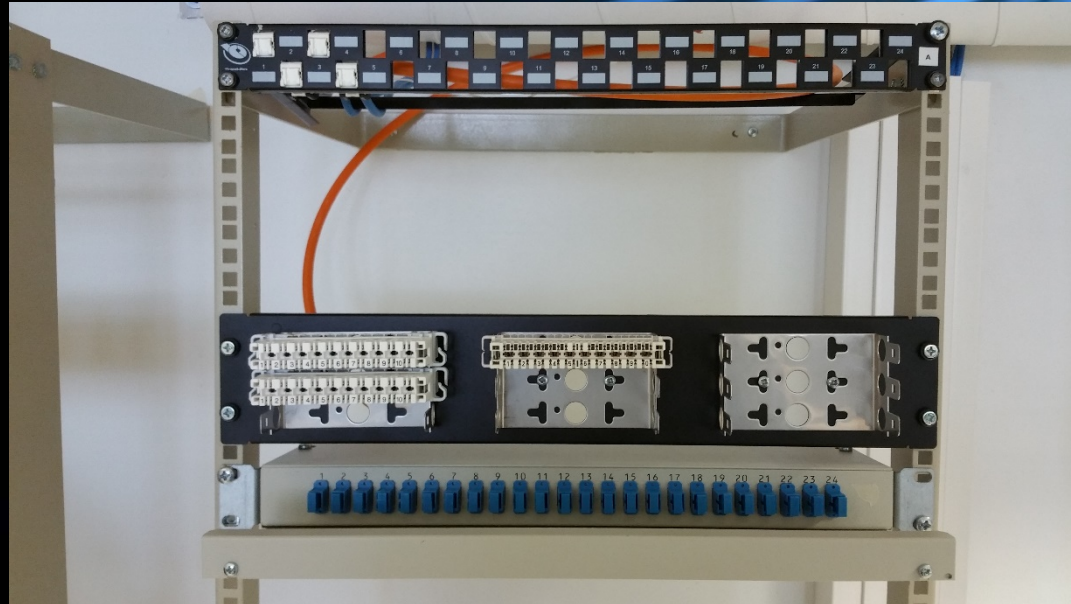

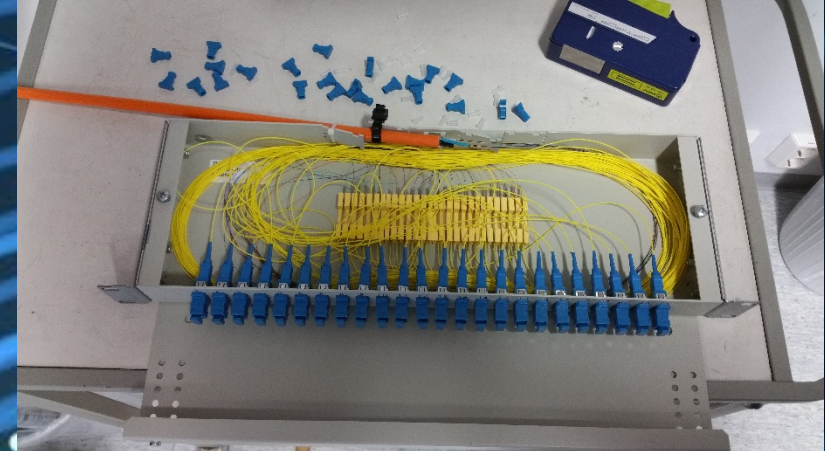

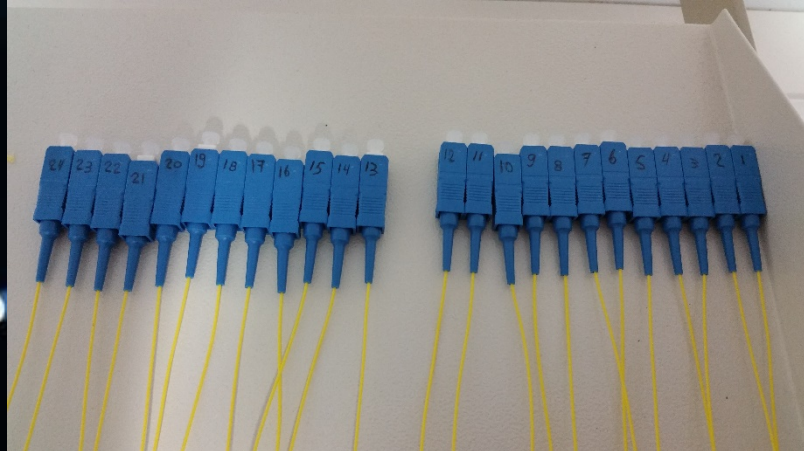

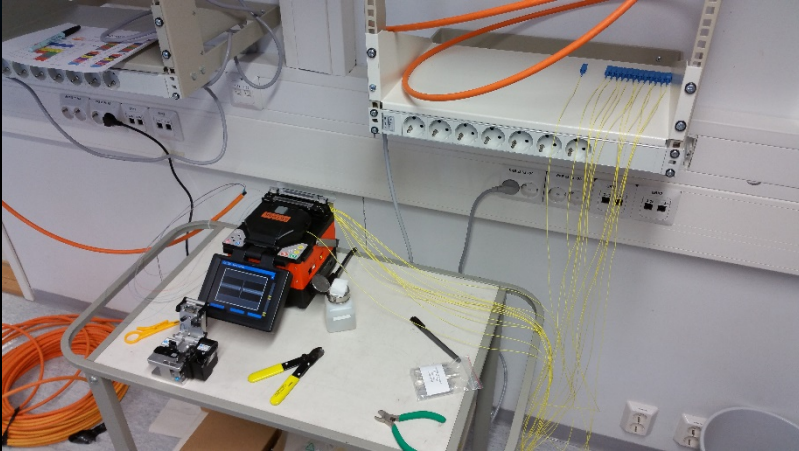

Cat 6 cable measurement

Welding Fiber Optic cables

Managing the Fiber Optic Patchbox

Mounting Fiber Optic cables

Configuring the Cisco router

Testing the network
