## About EMEU

EMEU (Engineering Mobility in Europe) is a network established by 10 technical colleges from six European countries. Since 2014, more than 50 modules have been developed enabling students across Europe to take part of their vocational education abroad.

EMEU is a Best Practices ECVET project. ECVET has been a focal point of the project to ensure transparency and quality of the student mobilities. Modules have been developed for five sectors: Mechanical and electrical engineering, construction, ICT and cabinet making.

The EMEU website [www.em-eu.eu](http://www.em-eu.eu) has received a lot of credit for being informative, user friendly and attractive for both students and teachers. You can find more details about the conference on the website.

**Please sign up for the meeting and conference through your international coordinator.**  
**Deadline for signing up:** 7 October 2016
